STOCK MARKET SLIDES WITH TOL-ERABLE UNIFORMITY.

Closing Liquidation Carried Over, Eacouraging Operators for the Short Account-Activity of Silver Forces Dis tresses the Street-Ballway News Contains Much Unfaverable Matter-"Special" Gold Shipment Epidemic Not Checked-London Stock Markets Dull.

New York, June 29.-The opening trading in stocks today was signalized by effective bear demonstrations against the list, the operators for the short account being encouraged by the nervousness of the street and by the extensive liquidation that had marked the close of the week. The dominating influence was again the activity of the pro-silver advocates. Other developments bearing upon the market included the publication of unfavorable traffic returns by the Burlington and St. Paul companies and the unexpected withdrawal of \$1,200,000 in gold for export. The Eurlington May report showed a decrease in net of \$228,554 and the St. Paul for the same month lost \$161,658 in net. Of the gold engaged all but \$59,000 goes to Germany under the special conditions which have be-come such familiar operations. Wall street has been treated to expert fore-casts to th effect that the "special" shipments has been practically wound up for the season and accordingly feit somewhat discouraged over the development. In addition to the considera-tions noted, liquidations became evident and as a result severe declines wer reorded all along the line. A rebeeming feature was the execution of heavy purchasing orders for foreign account to the estimated extent of 40,000 to 50,000 shares. This buying exerted only a temporary sustaining effect, however, and under renewed pressure prices again trended downward. As usual in a market of the character de scribed, stop orders were uncovered and additional stimulus was thereby given to the decline. The unfavorable character of the granger statements reacted on the other railway properties and in the slump large blocks of stocks frequently changed hands. Sugar was very erratic, moving frequently within a range of 1½ per cent. The extreme a range of 1½ per cent. The extreme break carried the price down i per cent, to 165% pr cent, and, although a raily to 111% followed, the closing was at about the lowest. Increased activity in Chicago Gas resulted in a decided slump in its price. The offerings were heavy and included the balance of a considerable speculative interest. The around midday and a break in it of 4% per cent, to 61% per cent, exerted a pro-nounced unsettling effect on other industrials. The coalers shared in the general depression, depite the strong Douglas, the building recently occupied support the Democratic tricket if it will general depression, depite the strong Douglas, the building recently occupied statistical position of the anthracite in-dustry. New Jersey Central led the Lard—Steady; Western Science St. 13% dustry. New Jersey Central let the refined steady. Petroleum—Dull; United closed \$1.13% decline in this group by a drop of 4% bid.

Turpentine—Steady, 25%-25% of Coffee—Options opened steady at a decline of 50% points; ruled quiet and feature less; closed dull at a net decline of 50% were 2% per cent in Burlington, 2% per uncless; closed dull at a net decline of 50% were 2% per cent in Burlington, 2% per cent in Rock cent in St. Paul and 3 per cent in Rock Island. Material declines occurred in many other instances and the market
